

REDMOND  
**REALSALT**

# RealSalt<sup>®</sup> means Real Flavor.

## Now with **three new seasoning-salt varieties!**

For years, Redmond RealSalt has set the standard for all-natural, no-additive salt. Now, we're introducing a new look for RealSalt, as well as three new gourmet seasoning-salt flavors!

### Why is RealSalt better?

Millions of years ago, our salt was part of a pristine sea, free of the pollutants and contaminants that have been introduced into the world since man's arrival. As the water evaporated, the salt was deposited in layers along with other beneficial trace minerals. A range of volcanos near the deposits erupted, sealing the salt deposits deep within the earth

and protecting them from any pollution sources. Today, near the small central Utah town of Redmond, we extract this salt and bring it to you in its all-natural state, without additives or preservatives. The result is a sweet "real salt" flavor you may not have experienced with other chemical-laden salts.

### New! RealSalt and savory seasonings combined.

You haven't experienced flavor until you try our new line of seasoning salts—the goodness of RealSalt in an onion salt, a garlic salt, and a zesty season salt. These flavorful salts are becoming favorites with some of the world's most experienced chefs, and now you can try the taste sensation for yourself with convenient 4-oz bottles. Find Redmond RealSalt brand products at your favorite health food distributor,
